# Walkway Covers

Available in a variety of frame designs, fabrics, and colors. These structures provide an attractive option for entrance and walkway canopies. Other features include zippered modular side panels for ease of assembly, windows, doors, heating, lighting, etc.

Frames are constructed of 1 1/2" or 2" tubing for a snug fit that can easily be assembled and taken apart. Corner and joint fittings are welded and are configured with eyebolts for ease of disassembly. Galvanized tubing is available in a variety of thicknesses from 17 gauge to commercial quality 20 to handle most snow and wind loads.

## Sizes

Each application is customized and widths may range from quite narrow up to 20 ft wide or wider. Available lengths range from 10' to 50' or longer, depending on your needs.

## Fabrics

Cost effective polyethylene may be utilized as well as high quality vinyl with up to a 7 year manufacturer's warranty. Other materials available.

## Fabric attachment:

The one piece tent top is fabric welded to resist deterioration. Grommets are installed in the hem to provide a strong attachment system. The top is attached to the frame with ball bungees which allow some stretch to reduce stress on the fabric and seams.

# Greenhouse Tents

Use for storage all year long..

Protect your plants and extend the growing season.

This economical greenhouse can be easily set up or taken down in less than an hour. Its compact design of steel joint fittings and galvanized tubing provide a long lasting solution to extending the growing season. The fabric is a one piece 7 oz. polyethylene material that is durable and long lasting. The UV protected covering can last for years. The fabric fits over the entire frame and is tucked under the base for a tight fitting look. A zippered rollup door allows easy access.

# Protect All

This versatile structure provides a complete enclosure and can be used in all types of weather. The complete tubular frame provides strength, durability and provides attachment for modular wall panels.

Wall panels are installed individually or can be made into a complete enclosure. A unique feature of the side wall panels are corner flaps and velcro that provide a secure attachment to adjacent wall panels. Also bottom flaps on the wall panels lay against the ground surface and greatly reduce outside air for situations that require heat or cooling.

Standard size is 10'x20' but custom sizes are available.

# Roller Curtains

This specific application has a custom heavy duty vinyl vinyl cathedral windows. The Roller Curtains are installed on an existing structure to block the wind and weather.

Our Roller Curtains are controlled by a gear box on a roller tube with a detachable handle for convenience. The bottom of each Roller Curtain has a pipe hem with a 1 1/2" galvanized pipe to provide stability on the bottom edge. The flexibility of the Roller Curtain enables anyone to raise and lower the curtain to the desired height using the detachable handle.

**See price list for current prices**

# Hip Roof Frame Tent (Designer)

Hip-Roofed structures come with either scalloped or straight edge valance panels along the sides. They add an attractive feature and place for the company logo or message. We have several material options including cost effective and durable polyethylene to a heavy duty long lasting vinyl material.

Purchase a kit below (less tubing) and save shipping costs

Peak-Roofed Canopies come in standard pitch or high pitch design. The high pitch canopies provide better run off of snow and moisture. It has a durable frame and canopy to protect vehicles, equipment, and other property. The frame is constructed of 1 3/8 galvanized tubing with 16 gauge welded steel fittings complete with eye bolt tensioning for easy assembly.

The standard fabric is a durable weather resistant polyethylene material that stands up to many years of the elements due to its woven sun blocker protective treatments.

# Frames, Fittings, Poles, Kits and Accessories

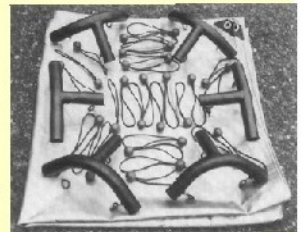

Our joint fittings are made of 16 gauge steel and are welded completely at each joint for long lasting strength. These fittings accept 1 3/8" galvanized tubing for a tight telescoping fit. Our standard finish is a durable primer surface and paint or powder coating is also available.

Our poles are constructed of 1 3/8" galvanized tubing and are available in various wall thicknesses. Standard poles are 17 gauge but Commercial Quality 20 with thicker walls are also available.

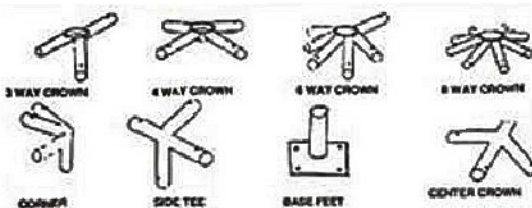

## Canopy Kit

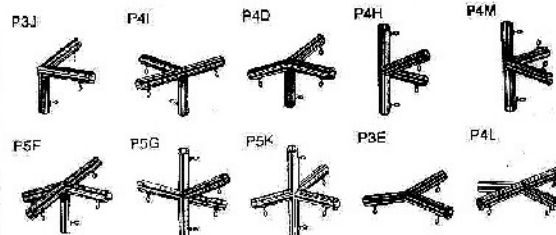

Our Canopy kit is available without tubing. You supply the conduit or pipes and save shipping costs. Heavy Duty sunblocker Tarp, fittings and bungee Ties are included. the tough all-weather woven sun blocker tarp, corner and peak fittings, ball bungee cords and tarp grommets spaced every 18". Available in silver or white. Connecting pipe and anchor feet sold sperately.

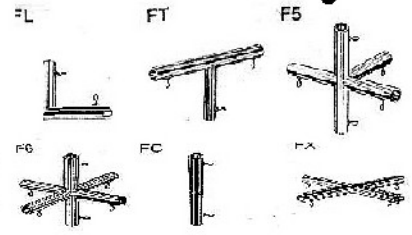

## Frame Tent Fittings

## Peak Roof Fittings

## Flat Roof Fittings

## Tailgate Canopy

The Tailgate canopy is anchored to the vehicle at the receiver hitch. This shade canopy utilizes a unique design that makes it easy to use and eliminates the need for tent staking or sandbags. The frame is manufactured of galvanized tubing and the top durable rip stop poly or vinyl, complete with grommets and ball bungee tie downs.

## Custom Work Booth

Booths come in a variety of colors, fabric options, sizes and designs. Fire retardant material available. They can range in size and be customized to fit your needs.

Design can include peaked top, flat top, or hip style roof. Variations can also include ventilation, zipper doors, and windows.
